

# Threat Prism Dashboard

26 June 2023 11:38

- Dashboard Symbols needed, not short names
- Do not show graphs at top.
- Ordering & sorting the traffic alerts in beside.

## Traffic

Routes

News and events

Insights

- There can be Feedback option for the users, so that website can be updated much better further
- Push notifications are not working in the website.
- Showing some pictures regarding any alerts so that it make users engage in the website.
- Example:-

- [https://dribbble.com/shots/19113627-Weather-Dashboard?utm\\_source=Clipboard\\_Shot&utm\\_campaign=yevled&utm\\_content=Weather%20Dashboard&utm\\_medium=Social\\_Share&utm\\_source=Clipboard\\_Shot&utm\\_campaign=yevled&utm\\_content=Weather%20Dashboard&utm\\_medium=Social\\_Share](https://dribbble.com/shots/19113627-Weather-Dashboard?utm_source=Clipboard_Shot&utm_campaign=yevled&utm_content=Weather%20Dashboard&utm_medium=Social_Share&utm_source=Clipboard_Shot&utm_campaign=yevled&utm_content=Weather%20Dashboard&utm_medium=Social_Share)
- If we get into KnowMyRisk --> Location : irrespective of the location all regions alerts are coming.
- Ask alerts are not working.
- In 'weekly report' it is written "south asia" and in travel risk it is written "India".
- Sorting with respect to time(48 hours,24 hours, 7 days) not working/not in operation.
- I suggest right after opening website, present day alert should be visible before hand.
- Rather than putting map in the whole home page, page can be put as a widget in the home and can also add present day alert and some other visualizations stuff.
- Problem with start and end date, they should show some warning if the end date is less than start date.
